Code examples

http://avtoclub.dn.ua/exam
https://github.com/pashakiz/traffic-rules-exam
Traffic rules exam on React/Redux/SASS/Webpack. Upgrade old repo, without create-react-app.
(Header and footer was copied from the auto school site, for which I made this project).

https://github.com/pashakiz/eroticfantasyclub,
https://github.com/pashakiz/mybustybeauty
HTML layouts from design (webpack, scss, js)

In addition, I wrote a couple of bots in a Telegram.
One of them: https://github.com/pashakiz/HealthyMealBot

Experience

[02.2020 - 05.2022] Freelance
Frontend Developer (JS/HTML/SCSS/webpack)
Converting Figma/XD to HTML/CSS/JS

[10.2016 – 07.2019] Clascal (Toronto, Canada), clascal.com
Fullstack Web Developer (remote, PHP (Codeigniter 2), JS (jQuery, Ajax), HTML/CSS, Git)

This is a platform for publishers of newspapers and advertisers. Advertisers can order online ads here on the central site and on the local newspapers sites of publishers. Publishers can place here his website or create it. There are three sides of the systems: 1) main dashboard for publishers and advertisers, 2) main Clascal site with international ads in English language, 3) and plugin for WordPress website for order ads directly from local newspaper sites.

Most of my role in this project is front-end, and some back-end too.

I can ask for a reference letter.
